

STATE OF ILLINOIS
ENVIRONMENTAL PROTECTION AGENCY

INTER-OFFICE CORRESPONDENCE

DATE: July 31, 1972
MEMO TO: Division of Land Pollution Control
FROM: William C. Child, Region 4, Collinsville
SUBJECT: ST. CLAIR COUNTY - LPC
E. St. Louis/Milam

US EPA RECORDS CENTER REGION 5

412246

On July 27, 1972 Greg Phillips, a Federal EPA summer employee, and I inspected the subject site for the purpose of completing a federal site survey for the county. The inspection was made at 10:15 a.m. and the weather was mild and clear.

One of the employees told us during the inspection that the radio-active material had been removed from the site. The inspection of the barrel storage area did not confirm or deny this statement. We were unable to ascertain whether the radio-active material had been removed or not as we did not have a geiger counter with us on this inspection. Two Milam employees were observed straightening up the barrels which had been tipped over and spilled during our previous inspection.

William C. Child
